### INFO - Multi Contact MC4

#### AS/NZS 5033:2012 - 4.3.7 (k)

Solar connectors can only be mated with the same type from the same manufacturer. If your panels have original MC4 (Multi-Contact-Series 4) connectors, then you must use the same type during your installation. If you do not know what brand you have on the panels, then you need to cut them off and put new ones on.
