

»JOKARI^{original} Locator box for 12 0009 and 12 0005

With the locator system, the user can equip their Allrounder sheath stripper CIMCO article no. 12 0009 or UNI-Plus CIMCO article no. 12 0005 with a force and height limiter (locator). After defining the blade spacing by precisely setting the locator to the wall thickness of the cable, the depth at which the blade can penetrate the cable sheath is limited. This significantly speeds up insulation stripping on type of cable which appear frequently. By adjusting the locator, the blade spacing on the Allrounder sheath stripper can be precisely set between 4.0 to 11.9 mm. The locator box can easily be stored in the tool handle and equipped with an Allen key as an accessory. The different colours of the locators provide the option to reserve set locators for selected types of cable which appear frequently. The locator system allows cut injuries caused by sharp blades to be avoided and allows a specified level of process safety to be attained in cable processing.

1.3 Application for network cables / fibre optic cables

»JOKARI^{original} PC-STRIP insulation stripper

Special wire stripping tool for data and control lines, communication lines, system cables, etc.

Sheath stripping: cable of 5 - 13 mm ϕ

Insulation stripping: conductors of 0.2 - 4.0 mm² or AWG 26 - 11
