Installation Notes

### Conductor termination

All conductor types at a glance

Inserting a conductor via push-in termination.
Solid conductors with cross-sections from either one size above, or up to two sizes below, the rated cross-section can be simply pushed in – no tools needed.

Removing a solid conductor.
Conductor removal is performed with an operating tool, just like CAGE CLAMP®.

Commoning
Insert push-in type jumper bar and push down until it hits backstop.

Removing a push-in type jumper bar:
Insert the operating tool between the jumper and partition wall of the dual jumper slots, then lift up the jumper.
Place the operating tool in the center of jumpers for up to five contacts (see above), or alternately on both sides for jumpers with more than five contacts.
Commoning
This star point jumper has been specially developed to create a "star point" and is used on motor terminal boards equipped with Rail-Mount Terminal Blocks TOPJOB® S.
WAGO
Testing

The modular TOPJOB® S connectors also connect conductors of the same size as the terminal blocks being used.
